iPod Nano

Curved ahead of the curve.

For those about to rock, we give you nine amazing colors. But that's only part of the story. Feel the curved, all-aluminum and glass design and you won't want to put iPod nano down.

Great looks. And brains, too.

The new Genius feature turns iPod nano into your own highly intelligent, personal DJ. It creates playlists by finding songs in your library that go great together.

Made to move with your moves.

The accelerometer comes to iPod nano. Give it a shake to shuffle your music. Turn it sideways to view Cover Flow. And play games designed with your moves in mind.

iPod shuffle

Instant attachment.

Wear up to 500 songs on your sleeve. Or your belt. Or your gym shorts. iPod shuffle is a badge of musical devotion. Now in new, more brilliant colors.

Feed your iPod shuffle.

iTunes is your entertainment superstore. It's your ultra-organized music collection and jukebox. And it's how you load up your iPod shuffle in one click.

Beauty and the beat.

Intensely colorful anodized aluminum complements the simple design of iPod shuffle. Now in blue, green, pink, red, and original silver.

MacBook Air

MacBook Air is nearly as thin as your index finger. Practically every detail that could be streamlined has been. Yet it still has a 13.3-inch widescreen LED display, full-size keyboard, and large multi-touch trackpad. It's incomparably portable without the usual ultraportable screen and keyboard compromises.

The incredible thinness of MacBook Air is the result of numerous size- and weight-shaving innovations. From a slimmer hard drive to strategically hidden I/O ports to a lower-profile battery, everything has been considered and reconsidered with thinness in mind.

MacBook Air is designed and engineered to take full advantage of the wireless world. A world in which 802.11n Wi-Fi is now so fast and so available, people are truly living untethered — buying and renting movies online, downloading software, and sharing and storing files on the web.
